

Reporting Module

This is an Adaptiv sub-topic discussing the Reporting module. This should be read in conjunction with the General Product Brochure.

Reports showing the performance of the network can be drawn to provide insight into trends, anomalies and possible problem areas.

There are two distinct types of reports in Adaptiv with different focus groups. Adaptiv separates reporting into last **48 hours** and **long term**. The 48-hour report offer close to real-time reporting on the last 48 hours and ensures detailed information on all calls, while the long term reports provide insight into multiple year's worth of data without time-consuming overnight report batching.

Operational environments focus on the performance of the devices with metrics such as ASR, ACD, errors, etc.

Business users are more concerned with the financial and quality impacts. Once again Adaptiv provides quick access to multiple-year's worth of financial information such as average costs, quality and total minutes.

Country	Total Calls	Successful Calls	ACD (minutes)	Egress AD (%)	Total Minutes	Supplier Cost
India	3,340	1,745	424	72	1,406,603	\$2.49
Indonesia	1,346	679	183	70	227,564	\$0.93
Iran	541	236	170	70	91,968	\$11.60
Iraq	35	10	47	86	1,638	\$0.02
Ireland	1,382	927	504	82	646,395	\$49.61
Israel	117	6	32	62	6,148	\$0.91
Italy	296	13	5	61	1,353	\$0.02
Japan	1,514	861	186	74	296,421	\$1.04
Jordan	95	53	233	71	22,093	\$8.51
Kazakhstan	768	298	210	63	157,952	\$28.40

Reconciliation reports provide a simple invoice comparison report. Calls are grouped based on the original rate sheet regions provided by the Supplier for easy comparison. end-of-month per region reports aligning the CDRs processed in Adaptiv with the Invoice region names used by the supplier. This allows for quick and easy comparison using the same region name conventions.

Conclusion

Adaptiv offers a real solution to network visibility across multiple routing devices.
